Survey Results

CCC

- have heard about the ccc camp
- Knew who organized the CCC
- people volunteering to help
- people that know some one that served in the ccc camp

What we did!

Finished Product

Problems we encountered

- Town meeting setting us back.
- Provided Supplies that would have cost us money and time.
- The other 2 buildings were not prepped by the city and ready to go for us.
- Our first paint pump went out, we had to get another one.
- Decided to replace doors instead of paint.

How is the government helping the cause?

- The ccc submits grants to the government and in return they receive so much money a year.
- The money the city receives goes to many different projects at the ccc camp; stairs, concrete, paint, refurbishing stuff, ect...

What did this project do for us

- This project helped us become more aware of the importance of historical sites and be more willing to learn, be active in our community.
