

Pollution in our Deserts

BY WILLIAM HALFORD

My Goal

My goal was to clean up a popular shooting area that lies within St. George City limits.

I wanted to make this area cleaner and safer.

What's the Problem?

- Massive amounts of garbage with in our city limits.
- Garbage harming desert ecosystem
- Reckless littering

Why does it matter?

- It matters because this area is within city limits and shooting is restricted. Cleaning this area will not only help the environment but send a message to other to not shoot there.

How you can help

- CLEAN UP AFTER YOURSELF.
- Understand the law as it pertains to recreational areas.
- Take only pictures, leave nothing but foot prints.
- Be environmentally minded.

Participation hours

A4

I became more *AWARE* of the effects that this pollution has had on the desert ecosystem

I've become more *ASTUTE* on how our local government is handling this problem

I can now *ARTICULATE* just how important it is to keep our local lands clean.

Because of the project I have become a more *ACTIVE CITIZEN*. I plan to better understand where I can shoot and where I can't. Also, be more conscience of my actions on public lands.
