

ALAN: THE CAN COLLECTOR

Parker LeBaron, Austin Rogers,
Chad Frehner

MEET ALAN

THE PROBLEM:

- The average person generates over 4lbs of trash everyday!
- Americans as a whole makes more than 200 million tons of garbage!
- It is estimated that 1500 cans are thrown away each second.
- Only 49% of those cans are recycled.

THE SOLUTION:

- Recycling 1 aluminum can saves enough energy to listen to a full album on your Ipod; recycling 100 cans generates enough energy to light your room for 2 weeks!
- Recycling aluminum cans saves 95% of the energy used to make alum cans from new material.

WHAT WE DID TO HELP

With our contribution...

Since our project until now, Alan has collected over 2,000 cans and still counting. These include the over 400 cans we collected. We then contributed a trailer to add onto Al's bike for when we no longer are there to help.

How you can get involved...

- <http://rockymountainrecycling.com>
- <http://www.usa.gov/Citizen/Topics/Environment-Agriculture/Conservation.shtml>
- OR...

Personally contact Alan. (You can see him riding local streets starting 8:00 a.m.)
