Name _____

Date _____

Class _____

Congratulations! You have been hired as a financial advisor for John and Tia Brown. During your meeting with the couple, John and Tia inform you that they have already developed a Statement of Financial Position and an Income and Expense Statement and used them to identify their financial goals:

1. Increase the amount of their emergency savings fund
2. Pay more on their monthly car loan payment to pay the loan off faster
3. Spend less money dining out at restaurants
4. Even though both John and Tia must purchase dress clothes for work, they want to spend less money on clothing every month

In order to reach these financial goals, John and Tia know they need to develop a Spending Plan. This is where they need your assistance. The couple does not know how to develop a Spending Plan and would like advice regarding what changes to make to their expenses in order to reach their goals. Follow the spending plan development process below to develop a Spending Plan for the Brown family.

Step One: Track Current Income and Expenses

John and Tia kept all their receipts for the month of January to develop an Income and Expense Statement. Review John and Tia's January Income and Expense Statement for a realistic view of their income and expenses.

Step Two: Personalize Your Spending Plan

John and Tia have requested that you develop a spending plan for the month of February. The couple used a spreadsheet to develop their Income and Expense Statement and have requested the same document and same categories for their Spending Plan. Find the column on the Brown family's Income and Expense Statement where the Spending Plan will be created for February.

Step Three: Allocate Money to Each Category

Use the column provided on John and Tia's January Income and Expense Statement to develop a spending plan for the family for the month of February. The couple has indicated a * next to expenses that are either contractual or they are unwilling to decrease. Remember to consider John and Tia's goals and consider the trade-offs they will have to make as a result of the changes. The final Spending Plan must have a net gain or a zero balance. (10 points for completion)

When the spending plan is complete, explain each change that you made. (5 points for completions)

Expenses <u>decreased</u> and by how much	Expenses <u>increased</u> and by how much

Now that their spending plan is complete, re-write John and Tia’s goals into SMART goals using their new spending plan. Make sure to indicate the trade-off(s) that will have to be made in order to reach each goal. (4 points)

	Example: John and Tia plan to save \$___ for their emergency fund by saving an additional \$_____ each month for “x” months. They will need to spend less on eating out to accomplish this goal.
1	
2	

Step Four: Implement and Control

What control system would you recommend John and Tia use? Explain. (2 points)

Step Five: Evaluate and Make Adjustments

After evaluating the spending plan, John and Tia realized that if they dine out at restaurants less often they will need to increase the amount planned for their monthly grocery expense. They would like to increase their grocery budget by \$20.00. Make this adjustment to John and Tia’s Spending Plan ensuring they still have a net gain or zero balance. (1 point)

How has creating a spending plan helped the Brown Family? (1 point)

Income and Expense Statement for:	John and Tia Brown	
Time Period:	January	
	Amount	Planned Amount for February
Income
